

REGION OF ATTICA

A Sea of Green: Shaping a Resilient and Sustainable Tomorrow for Greater Athens

The Region of Attica invites you to the "European Week of Regions and Cities 2025", taking place in **Brussels** on 14 & 15 October, to explore a bold vision of a dynamic and sustainable urban transformation:

The redevelopment of the Faliro Bay area into the "Aenaon Park", co financed by the "Environment and Climate Change 2021-2027" Programme. An open, inclusive Mediterranean park reconnecting the city with the sea. Designed in line with the New European Bauhaus (NEB) principles of sustainability, aesthetics, and inclusion, the park creates a new recreational Metropolitan area, cultural spaces and climate-resilient infrastructure.

Alongside, the Region's Integrated Territorial Investment of the Metropolitan parks - "Pedion Areos", "Attiko Alsos", and "Antonis Tritsis", co financed by the Regional Programme "Attiki" 2021-2027, showcases a vision of a wider green network across Greater Athens, shaping a resilient and sustainable tomorrow for the city.

We look forward to welcoming you at the Square Brussels, Exhibition Area, Grand Hall 2 (Stand 252249).
